

MODEL 2300

safety brine valve assembly

SAFETY BRINE VALVE

This control is used primarily as a safety shut off on time fill brine systems.

SOLID BRASS AND MONEL CONSTRUCTION

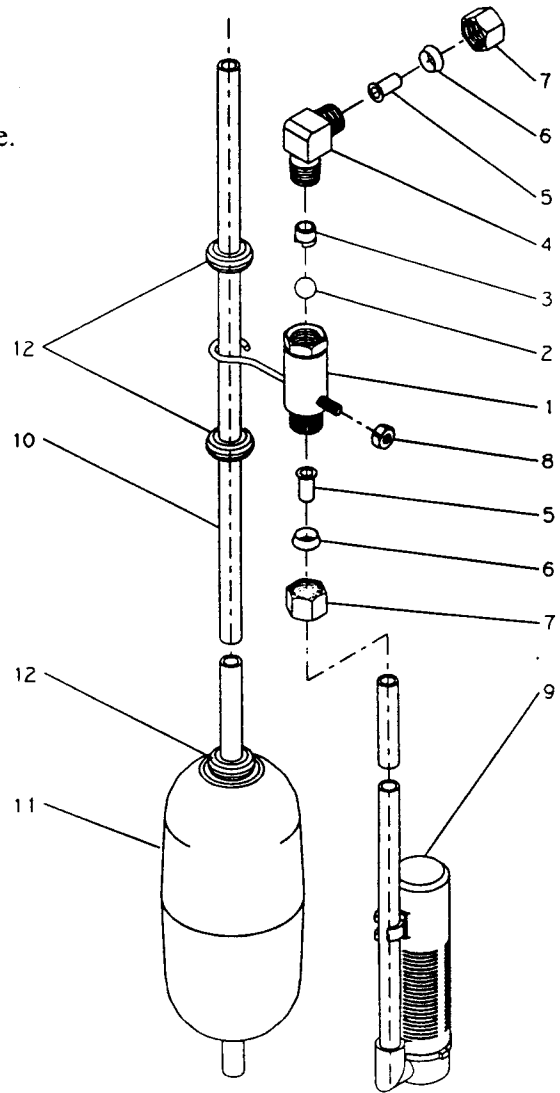

Quality brass body and monel ball assures long valve life.

POSITIVE SHUT OFF

Monel ball on soft rubber seat provides reliable shut off.

MOUNTED ABOVE BRINE

The valve is mounted above the brine solution to keep it out of the sediment collecting in the bottom of the tank.

Assembly No.

- 60027-FFA (Fitting facing arm)
- 60027-FFS (Fitting facing stud)
- 60028 (Float)

Item No.	Quantity	Part No.	Description
