The following sample(s) was/were submitted and identified on behalf of the clients as: STAINLESS STEEL CORRUGATED HOSE.

SGS Job No.: SP16-037687 - SH
Model No.: SD16
Date of Sample Received: 24 Oct 2016
Test Requested: Selected test(s) as requested by client.
Test Method: Please refer to next page(s).
Test Results: Please refer to next page(s).
Conclusion: Based on the performed tests on submitted sample(s), the results of Lead, Mercury, Cadmium, Hexavalent chromium comply with the limits as set by RoHS Directive (EU) 2015/863 amending Annex II to Directive 2011/65/EU.

<tbody>
<tr>
<td>SN1</td>
<td>SHA16-231278.002</td>
<td>Silver metal</td>
</tr>
</tbody>
</table>

Remarks:

1. 1 mg/kg = 0.0001%
2. MDL = Method Detection Limit
3. ND = Not Detected ($<\text{MDL}$)
4. "-" = Not Regulated

Test Method:
1. With reference to IEC 62321-5:2013, determination of Cadmium by ICP-OES.
2. With reference to IEC 62321-5:2013, determination of Lead by AAS.
3. With reference to IEC 62321-4:2013, determination of Mercury by ICP-OES.

</tr>
</tbody>
</table>

Notes:

1. The maximum permissible limit is quoted from RoHS Directive (EU) 2015/863.
2. * = a. The sample is positive for CrVI if the CrVI concentration is greater than 0.13 µg/cm². The sample coating is considered to contain CrVI
   b. The sample is negative for CrVI if CrVI is ND (concentration less than 0.10 µg/cm²). The coating is considered a non-CrVI based coating
   c. The result between 0.10 µg/cm² and 0.13 µg/cm² is considered to be inconclusive - unavoidable coating variations may influence the determination

Information on storage conditions and production date of the tested sample is unavailable and thus Cr(VI) results represent status of the sample at the time of testing.

IEC 62321 series is equivalent to EN 62321 series
