

1191/1190FP In-Out Heads

1191 In-Out Head

Order Number: D1400

The 1191/1190FP 1" In-Out Heads are designed for downflow filter applications or upflow pH neutralization.

Molded out of a rugged thermoplastic resin, the 1191 Head features a 1/4" FPT air vent port which can be drilled out to accept an air relief valve. The 1" Head is fully ported to provide maximum flow rates.* The 1191 incorporates a standard 2 1/2" tank connection and features parallel inlet and outlet ports to easily adapt to standard plumbing connections or Clack's all-plastic, four-way bypass valve. A full line of fitting plumbing connection kits are available.

The 1190FP Head has a removable fill port cap to allow easy access to the media bed. The 1190FP includes a removable upper distributor basket providing access to the top of the riser pipe, allowing water to be drained from the tank when replacing media. The 1190FP includes a utility wrench to be used with the removable cap. A full line of top and bottom distributors is available.

*Note: Riser pipe port is sized for a 1.050" O.D. pipe.

1190FP In-Out Head with Fill Port

Order Number: D1220-01

ORDER NO.	DESCRIPTION	QTY/CARTON
D1400	1191 In-Out Head	24
