

Duke Aerator

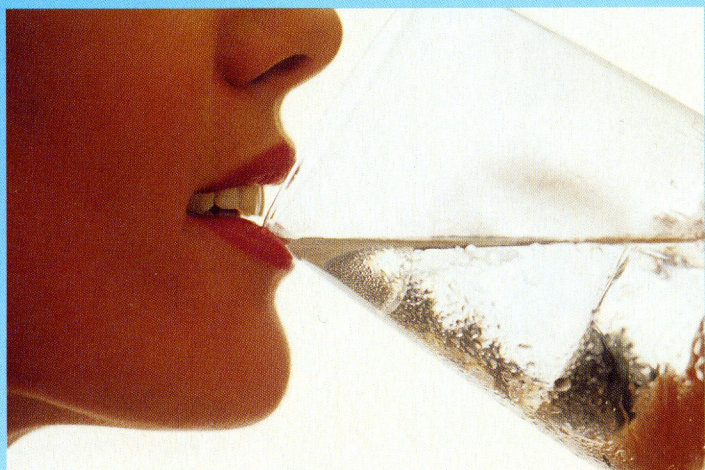

Water Aeration System

*The best proven system for
the removal/reduction of gases
from potable water, such as
Hydrogen Sulfide, Methane,
Radon, Volatile Organic
Compounds, Carbon Dioxide
and Odors*

By
WATER GUARD™

Improves Taste & Odor

How It Works

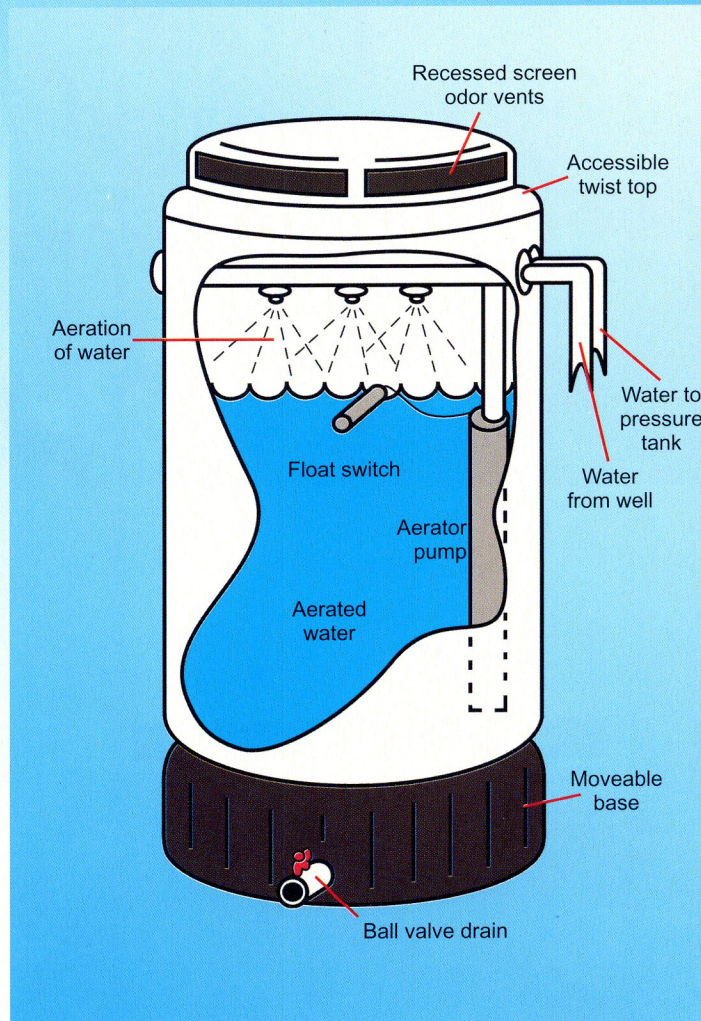

Well water enters the unit from the well pump and is sprayed through special non-clogging nozzles. This creates a fine mist, thereby releasing gasses from the water.

Duke Aerator Features

- Reduces gases naturally with no chemicals
- Reduces annoying odors
- Years of low cost operation
- Durable, high density polyethylene blow molded construction
- Channel design top for outstanding rain water drainage
- Ultra violet resistant
- Twist top accessibility
- Moveable Base
- Flat inlet outlet connection areas
- Recessed screen
- Constructed of FDA approved components
- 1/2 HP submersible pump, 115v or 220v
- Optional pressure tank

Model	Diameter	Height
Duke 20 MY2A	30.5"	60"
Duke 20 MYA	30.5"	60"
