

UFL Ultrafiltration System

Improve the quality of drinking water throughout the home and decrease the number of maintenance issues that are caused by poor water quality with a UFL system.

The UFL systems feature an ultrafiltration cartridge that substantially reduces particles from the water. The system is self-cleaning, which extends the life of the ultrafilter and allows it to operate with little user intervention.

NOTE: The Flush Tank Kit (P/N 7000472) is highly recommended to improve the flushing function and extend the life of the ultrafilter.

NOTE: Additional chemical, taste, odor, and scale reduction systems are also available.

Features

- .015 micron ultrafiltration significantly reduces particles, assuring consistent, high-quality water.
- Self-cleaning capabilities extends the life of the ultrafilter.
- Operation simplicity.
- Several sizes available to meet various flow rates.

UFL Ultrafiltration System

VIZION™ offers systems that significantly reduces particles from water, yielding filtered water and fewer maintenance issues related to poor water quality. The UFL series combines that capability with a small footprint for added flexibility in installation.

- Maximum Operating Pressure: 100 psig (690 kPa)
- Maximum Operating Temperature: 104°F (40°C)
- Nominal Pore Size: .015 microns
- pH Range: 3 to 10
- MWCO: 100 kD
- Volts: 100 to 240
- Watts: 10
- Amps: 0.4
- Includes plug adaptors for US, Europe, Australia, and UK
